

How to program the RS-109M AIS Locator

1. download the software:

<https://recent-radio.co.za/wp-content/uploads/2025/01/Net-Locator-Programming-Software-V2.0.0.zip>

2. unzip software
3. run Customer_Program_Software
4. click "English"

5. enter desired parameters:

MMSI: your MMSI

Name: your ship station name

TX Timer(s): frequency of AIS transmission intervals in seconds

Extended information: select

ShipAndCargo: e.g. 37 - Pleasure Craft, 36 - Sailing, 30 - Fishing
see list here: <https://api.vtexplorer.com/docs/ref-aistypes.html>

CallSign will be your battery %

Reference points: distance in m to bow, stern and sides from your locator position

Port Select: select your PC's port where the Locator is connected.

6. ensure that locator is powered on

7. click "Write"
